Investment Discovery (US) — 9 candidates

Ticker	Hypothesis	Next key dates	Status	Conviction
AVNS merger_arb	American Industrial Partners signed definitive agreement to acquire AVNS for \$25.00 cash per share (72.1% premium). All-cash deal, standard antitrust review expected, shareholder approval likely. Market pricing ~95% completion probability at 1.3% spread.	2026-05-15 — HSR 30-day clock clearance window 2026-06-15 — DEF 14A proxy filing expected 2026-07-30 — Expected shareholder vote window	active	high
AXSM drug_approval	AXS-05 (dextromethorphan + bupropion) for Alzheimer disease agitation has 60-70% approval probability based on 3-of-4 Phase 3 hits, Priority Review, and commercial prep behavior inconsistent with CRL expectation. Market implies ~45-55%, creating ~4.5% expected-value mispricing.	2026-04-30 — PDUFA decision for AXS-05 ADA sNDA 2026-05-04 — Q1 2026 earnings	active	high
GSAT merger_arb	Amazon-Globalstar merger arb with shareholder vote contractually eliminated (Thermo/Monroe 45.75% Stockholder Support Agreement executed Apr 13 2026). At \$80.64 reference, 10.6% gross spread to \$89.21 floor (post maximum \$110M HIBLEO-4 milestone adjustment) over a 15-18 month close horizon produces ~7-9% annualised return. Primary residual risk is FCC spectrum transfer review; HSR/DOJ and milestone execution are secondary.	2026-05-15 — Schedule 14C information statement expected (30 days post-8-K) 2026-05-15 — HSR filing and 30-day waiting period expected 2026-06-15 — S-4 registration statement for stock-election consideration (45 business days from signing)	active	medium
RGR activist	Beretta Holding S.A. (RGR's largest individual shareholder at 9.95%) has launched a multi-track activist campaign — a \$44.80/share cash partial tender offer for an additional ~20% of shares (subject to Pill exemption) and a four-nominee minority slate at the 2026 Annual Meeting. The market has only modestly repriced (+4.2%, still 5.8% below the publicly disclosed tender price) on declining volume, indicating it is heavily discounting the Pill-exemption probability and the optionality of a Chancery test or negotiated settlement. Asymmetric setup: tender clears +5.8%, settlement +10–25%, withdrawal -5–10% downside floored by Beretta's continuing 9.95% support.	TBD — Board response to Pill-exemption ask (deadline already passed Mar 31) TBD — Beretta files Delaware Chancery action (if Pill exemption denied) TBD — Ruger DEF 14A filing — fixes 2026 Annual Meeting date	active	high
RPAY activist	Forager Fund accumulated 12.9% of RPAY; board adopted poison pill with 12.5% trigger calibrated precisely below Forager's stake. Three 13D amendments in 30 days suggest imminent proxy contest or sale demand. Activist campaigns of this type historically deliver 30-60% returns over 6-18 months.	TBD — Forager 13D/A Amendment No. 3 (responsive filing) TBD — PREC14A preliminary proxy statement (if Forager formally contests) TBD — DEF 14A annual meeting proxy (nomination window critical catalyst)	active	high
SEM merger_arb	SEM is a signed WCAS XIV + Ortenzio family take-private at \$16.50/sh cash with only a 0.73% gross spread over a ~7.5-month horizon to the 2026-12-01 Outside Date — ~1.1% annualized, below risk-free. Deal certainty is relatively high (top-quartile PE sponsor + family rollover) but the risk/reward is asymmetric (+0.7% upside vs ~-14.5% break downside). Watchlist stance: re-engage only on spread widening to 3%+ via HSR pushback, shareholder litigation bump, or financing disruption.	2026-04-15 — PREM14A + SC 13E-3 filed (deal disclosure) 2026-05-15 — DEF 14A definitive proxy expected (20-45 days post-PREM14A) 2026-05-15 — HSR 30-day waiting period clearance window (approx)	active	low

Ticker	Hypothesis	Next key dates	Status	Conviction
TVTX	<i>[backfill pending on next deep-dive run]</i>	—	delivered	—
VERA drug_approval	Atacicept (dual BAFF+APRIL inhibitor) for IgAN has exceptional NEJM Phase 3 data (46% proteinuria reduction, 68% Gd-IgA1 reduction, 81% hematuria resolution). Market underestimates commercial positioning vs sibeprenlimab based on superior efficacy and potential pricing parity with \$292.5K benchmark.	2026-07-07 — PDUFA decision for atacicept (Accelerated Approval) 2026-05-15 — Mid-Q2 2026 earnings (commercial prep tone)	active	medium
VRDN drug_approval	Veligrotug (IV anti-IGF-1R) for thyroid eye disease has 70% PRR vs 5% placebo in active TED and 56% vs 8% in chronic TED. Stock down 51% from highs due to elegrobart competitive pressure, not veligrotug approval risk. PDUFA June 30 could trigger re-rating.	2026-06-30 — PDUFA decision for veligrotug (Priority Review + Breakthrough) 2026-05-31 — REVEAL-2 Phase 3 elegrobart results (chronic TED)	watch	high

Non-US Discovery — 24 candidates

Ticker	Hypothesis	Next key dates	Status	Conviction
1878_XTKS merger_arb	Daito Trust Construction (1878.XTKS, mcap \$7.2B) is conducting a tender offer for THE Global Co. (3271.XTKS) at ¥1,280/share (~19.9% premium). Board has recommended acceptance. Correction filing on Apr 16 is most likely administrative. Spread is very tight (<2%), making this a low-IRR but high-certainty arb. Trade is on the target (3271), not the bidder. Recommendation: WATCH unless spread widens above 3%.	2026-04-16 — Correction filing effective 2026-05-22 — Tender offer close TBD — Settlement / payment (~T+30 post-close)	active	watch
1882_XTKS litigation	Toa Road Corporation (1882.XTKS) disclosed a litigation regulatory matter on 2026-04-15 (scanner score 29.0, tc 0.85, \$485M USD mcap). Initial direction is short; thesis is contingent on materiality of the matter relative to enterprise value and on the regulatory or court timeline. Deep-dive must verify whether this is a discrete charge or a recurring liability stream, and whether peer precedents support a one-time-event re-rating once resolved.	2026-04-15 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
2540_XTKS merger_arb	Yomeishu Seizo Co.,Ltd. (2540.XTKS) was flagged on 2026-04-09 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$351M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-09 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
2692_XTKS merger_arb	ITOCHU-SHOKUHN Co., Ltd. (2692.XTKS) was flagged on 2026-04-10 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$1032M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-10 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch

Ticker	Hypothesis	Next key dates	Status	Conviction
2972_XTKS merger_arb	SANKEI REAL ESTATE Inc. (2972.XTKS) was flagged on 2026-04-14 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$368M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-14 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
3391_XTKS merger_arb	Tsuruha Holdings Inc. (3391.XTKS) was flagged on 2026-04-15 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$5812M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-15 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
4206_XTKS merger_arb	Aica Kogyo Company, Limited (4206.XTKS) was flagged on 2026-04-13 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$1417M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-13 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
4343_XTKS other	AEON Fantasy Co., Ltd. (4343.XTKS) disclosed impairment loss on 2026-04-09 (\$311M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.	2026-04-09 — Initial scanner signal / source filing 2026-04-09 — Primary catalyst	active	watch
6027_XTKS other	Bengo4.com,Inc. (6027.XTKS) disclosed impairment loss on 2026-04-15 (\$389M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.	2026-04-15 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
6058_XTKS other	Vector Inc. (6058.XTKS) disclosed impairment loss on 2026-04-14 (\$375M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.	2026-04-14 — Initial scanner signal / source filing 2026-04-14 — Primary catalyst	active	watch

Ticker	Hypothesis	Next key dates	Status	Conviction
6135_XTKS merger_arb	Makino Milling Machine Co., Ltd. (6135.XTKS) was flagged on 2026-04-10 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$1710M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-10 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
6197_XTKS merger_arb	Solasto Corporation (6197.XTKS) was flagged on 2026-04-09 via TDnet for a mbo announcement signal (scanner score 35.0, translation confidence 0.92, \$637M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-09 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
6367_XTKS litigation	Daikin Industries, Ltd. (6367.XTKS) disclosed a litigation regulatory matter on 2026-04-10 (scanner score 29.0, tc 0.85, \$37335M USD mcap). Initial direction is short; thesis is contingent on materiality of the matter relative to enterprise value and on the regulatory or court timeline. Deep-dive must verify whether this is a discrete charge or a recurring liability stream, and whether peer precedents support a one-time-event re-rating once resolved.	2026-04-10 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
7085_XTKS earnings	CURVES HOLDINGS Co., Ltd. (7085.XTKS) disclosed a profit upgrade on 2026-04-13 (\$504M USD mcap, scanner score 29.0). Thesis is long on the assumption that the upgrade has not been fully reflected in consensus and will pull forward analyst revisions. Deep-dive must assess whether the beat is structural (mix, pricing, demand) or transitory, and whether the stock has already moved in line with the magnitude of the upgrade.	2026-04-13 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
7512_XTKS other	Aeon Hokkaido Corporation (7512.XTKS) disclosed impairment loss on 2026-04-09 (\$759M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.	2026-04-09 — Initial scanner signal / source filing 2026-04-09 — Primary catalyst	active	watch
8001_XTKS merger_arb	ITOCHU Corporation (8001.XTKS) was flagged on 2026-04-10 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$87870M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-10 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch

Ticker	Hypothesis	Next key dates	Status	Conviction
8267_XTKS merger_arb	Aeon Co., Ltd. (8267.XTKS) was flagged on 2026-04-15 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$30388M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-15 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
8934_XTKS merger_arb	Sun Frontier Fudousan Co., Ltd. (8934.XTKS) was flagged on 2026-04-10 via TDnet for a tender offer signal (scanner score 35.0, translation confidence 0.92, \$1017M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. 9601_XTKS other	Shochiku Co., Ltd. (9601.XTKS) disclosed impairment loss on 2026-04-14 (\$912M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.	2026-04-14 — Initial scanner signal / source filing 2026-04-14 — Primary catalyst	active	watch
CCL_XASX other	Cuscal Limited (CCL.XASX) flagged for a equity placement on 2026-04-14 (\$575M USD mcap, scanner score 30.5). Direction defaults to short; institutional placements can be either a dilution drag or a credibility signal depending on the buyer and use of proceeds. Deep-dive must verify the discount, the lock-up structure and the strategic rationale before sizing.	2026-04-14 — Initial scanner signal / source filing 2026-04-14 — Primary catalyst	active	watch
ITRK_XLON merger_arb	Intertek Group (ITRK.XLON, FTSE 100, mcap £6.6B) received a Rule 2.4 possible offer from EQT (Swedish PE). Board rejected the indicative proposal on Apr 13 and simultaneously announced a strategic review to potentially split into two businesses. Shares +13% to 4,292p despite rejection. PUSU deadline May 14. No price disclosed. Historical 2.4→2.7 conversion rate ~55%. Multi-path setup: revised EQT bid, strategic-review value unlock, or walk-away. Recommendation: WATCH with 1-3% satellite sizing.	2026-04-16 — EQT Rule 2.4 announcement + Intertek response 2026-05-14 — PUSU deadline (put-up-or-shut-up, Rule 2.6(a)) TBD — Rule 2.7 firm offer (if converts, T+28 to T+56)	active	watch
PDI_XASX merger_arb	Predictive Discovery (PDI.XASX) and Robex Resources (RBX.TSXV) are completing a merger-of-equals via Quebec statutory plan of arrangement. All conditions precedent satisfied; deal is unconditional with effective date ~April 15, 2026. Exchange ratio 7.862 PDI shares per Robex share. Arb spread is ~0.9%, below execution friction threshold. Recommendation: no trade (procedural update on done deal).	2026-04-15 — Merger effective/implementation date (approximate) 2026-04-30 — Outside date (backstop) TBD — PDI TSX listing commencement (post-implementation)	active	low

Ticker	Hypothesis	Next key dates	Status	Conviction
PTSB_XLON merger_arb	PERMANENT TSB GROUP HOLDINGS PLC (PTSB.XLON) was flagged on 2026-04-14 via TDnet for a takeover firm offer signal (scanner score 33.0, translation confidence n/a, \$1764.2M USD market cap). Standard playbook is a long into the announced spread, sized to annualized IRR pending deep-dive verification of price, premium, counterparty and timing. Edge depends on whether the market has fully priced the announcement and whether the filer is the buyer or target — direction must be re-confirmed on PDF read before sizing.	2026-04-14 — Initial scanner signal / source filing TBD — Resolution window (T+5 to T+30 typical for this signal type)	active	watch
WBC_XASX other	Westpac Banking Corporation (WBC.XASX) flagged for a results items impacting signal on 2026-04-13 (scanner score 30.0, tc n/a, \$101170M USD mcap). Working direction is short; the thesis is contingent on deep-dive verification of magnitude, timing and counterparty. Default playbook is to scope position to liquidity and confirm the catalyst is not already priced in.	2026-04-13 — Initial scanner signal / source filing 2026-04-13 — Primary catalyst	active	watch
