Upward revision to profit forecast. Direction=long on positive guidance delta; verify magnitude and whether consensus had already moved.

Steelman of the opposite view

****Pending deep-dive.**** Likely angles:

- Market already priced in the disclosure (no edge).

- Terms / magnitude less favorable than headline implies.
- Counter-catalyst exists (regulatory, activist, competing bid).
- Translation / interpretation error — revisit tc if direction flips on re-read.

Web research layer (mandatory — pending)

- Nikkei / Reuters / Bloomberg coverage of CURVES HOLDINGS Co., Ltd.
- Peer precedents for the same signal_type in JP market
- Shareholder register (activist presence?)
- Analyst coverage & recent target price moves

Kill conditions

- **Kill 1:** Subsequent TDnet filing revising terms unfavorably — flip or cut.
- **Kill 2:** Board or independent committee opposes (for takeover signals); regulatory action escalates (for litigation signals).
- **Kill 3:** Translation re-read flips thesis direction → exit.
- **Kill 4:** Scanner flags superseding signal at the next cycle.
