

Aeon Hokkaido Corporation (7512.XTKS)

Deep Dive — Impairment Loss · Generated 2026-04-15 · Source tool: non_us

Hypothesis

Aeon Hokkaido Corporation (7512.XTKS) disclosed impairment loss on 2026-04-09 (\$759M USD mcap, scanner score 31.0). Working hypothesis is short: one-off accounting hits often create clean-slate setups where the market over-discounts forward earnings. Deep-dive must quantify the cash vs. non-cash split, confirm guidance is not being lowered structurally, and identify any catalyst that re-anchors valuation post-disclosure.

Source candidate body (verbatim)

AEON Hokkaido (7512.XTKS) — Special losses booking

****STATUS: pending_deep_dive.**** Automated-scanner stub. Do not act on this alone.

TL;DR

On 2026-04-09 (04:30 UTC / 13:30 JST) AEON Hokkaido — the Hokkaido-regional supermarket/GMS operator within the AEON group — released a TDnet filing titled 「特別損失の計上に関するお知らせ」 ("Notice of booking of special losses"). Scanner classifies signal_strength=4, thesis_direction=short, tc=0.88. Score 31 — immediate route. At \$759M USD market cap, comfortably above the floor but still small-cap by global standards. The single-topic filing (no offsetting non-op income) is typical of store-closure impairment at a regional GMS operator facing secular footfall decline in regional Japan.

Source signal

- ****Source URL****: <https://www.release.tdnet.info/inbs/140120260408500265.pdf>
- ****Filing date/time****: 2026-04-09 04:30 UTC (previous-day docID suggests 2026-04-08 filing released 2026-04-09)
- ****Local-language headline****: 「特別損失の計上に関するお知らせ」
- ****Signal ID****: `0d8a11326fdbca771918ce088f9264ff`

Translation notes

Translation confidence 0.88 — above the 0.85 direction-allow floor. Scanner tag `short` reflects the `特別損失` pattern. Deep-dive MUST read the PDF to confirm:

- Actual yen magnitude
- Whether this is store-closure impairment (most likely for a regional GMS), restructuring, or PP&E writedown
- Any concurrent FY guidance revision

Company context (to be completed by deep-dive)

- Market cap: \$759M USD (JPY ~¥114B). Mid-cap by Japan standards.
- Sector: Food & Staples Retailing (supermarkets / GMS).
- Parent/affiliate structure: AEON group (parent 8267). AEON operates several regional listed subsidiaries including 7512 (Hokkaido), 8273 (Kyushu), 8278 (Daiei — delisted), 2653 (Liquor — delisted).
- Fiscal year: AEON group FY ends February. April 2026 filings relate to FY2026 close.
- Business: ~130 stores in Hokkaido under AEON / MaxValu / DAIEI banners. Secular pressure from depopulation of regional Hokkaido + wage inflation on store-level opex.

- 30/90-day price: TODO. `7512.T` via yfinance.
- Recent news: TODO — check for store-closure announcements in Hokkaido press (Hokkaido Shimbun, Nikkei regional).

Thesis statement (to be completed by deep-dive)

****Pending.**** Direction pre-tagged `short` — standard TDnet 特別損失 pattern without an offsetting income item.

Deep-dive must:

- Read the PDF to extract:
 - Special loss amount (JPY)
 - Classification (impairment of tangible fixed assets? closure cost? inventory write-down?)
 - Number of stores affected (if store-closure)
 - Whether concurrent FY2026 (Feb-end) guidance revision was filed
- Compare loss magnitude to consensus FY2026 net income (BBG JP consensus)
- Check whether 8267 AEON parent filed a companion release on the same day (group-level impact)

Steelman of the opposite view

Regional GMS operators in Japan (7512 Hokkaido, 8273 Kyushu) periodically book store-closure impairments as part of portfolio rationalization; these are ****typically pre-flagged in the medium-term plan and already in analyst estimates****. If:

- The loss is consistent with the previously-disclosed "restructuring reserve" budget
- The closures improve store-level ROIC (closing loss-making stores is a long-term positive)
- Management simultaneously raises the FY2027 operating-profit outlook on the improved store portfolio

...then the stock can rally on the release as a "kitchen-sinking" signal. Deep-dive must check whether 7512's existing multi-year plan already included store closures at this scale.

Web research layer (deep-dive TODO)

- Search Nikkei for "イオン北海道 店舗閉鎖" (AEON Hokkaido store closure) in last 90 days

- Check AEON Hokkaido IR page at <https://www.aeon-hokkaido.jp/ir/>
- Cross-reference 8267 parent AEON filings on the same day
- Check sister-company 8273 AEON Kyushu for parallel filings (group-wide restructuring signal vs. Hokkaido-idiosyncratic)

Kill conditions

- ****Kill if**** special loss < ¥1B (immaterial vs. ¥114B market cap)
- ****Kill if**** guidance HELD or RAISED on the same day
- ****Kill if**** closure plan was pre-announced in the medium-term plan
- ****Kill if**** 20-day ADV < \$1M USD — untradeable
- ****Kill if**** stock already down >10% in 30 days pre-filing
- ****Kill if**** deep-dive finds the loss is non-recurring and management guides to improved FY2027 margins

Catalyst map

- ****Primary catalyst****: FY2026 results release (typically early April for Feb-end FY) — watch concurrent guidance revision
- ****Window****: 0–21 days
- ****Entry trigger****: deep-dive confirms material loss + guidance cut
- ****Exit trigger****: earnings-day reversal or kill condition hit

Position sizing

Placeholder. 7512 liquidity is thin; 20-day ADV check required. Target: 0.5–1.0% net short on high conviction, halved at $tc=0.88$.
