## ACTIVE — 8 candidate(s)

**VRDN | Score: 31.5 | Profile: binary\_catalyst | Stage: active**

**VRDN — Veligrotug PDUFA (Thyroid Eye Disease)**

Status: ~Active~ → · Strategy: FDA PDUFA · Identified: 2026-04-09 · Updated: 2026-04-16

**Key dates:** e 30, 2026, n 30, 2026

**Rationale:** Viridian Therapeutics has a near-certain FDA approval upcoming for veligrotug, an IV anti-IGF-1R antibody for thyroid eye disease (TED), with a PDUFA date of June 30, 2026. The BLA was granted Priority Review and Breakthrough Therapy designation, and both Phase 3 trials (THRIVE for active TED, THRIVE-2 for chronic TED) met all primary and secondary endpoints with robust efficacy data. The probability of regulatory approval is high.

**AXSM | Score: 30.8 | Profile: binary\_catalyst | Stage: active**

**AXSM — AXS-05 Alzheimer Disease Agitation PDUFA (April 30, 2026)**

Status: ACTIVE CANDIDATE · Strategy: binary\_catalyst · Updated: 2026-04-16

**Key dates:** l 30, 2026, 2026-04-30

**Rationale:** What the market appears to be pricing (implicit): ~45–55% approval probability, based on modest pre-PDUFA run (+5.6% Apr 9) vs. the \$230–245 sell-side price targets.

**Sources:** <https://www.fda.gov/news-events/press-announcements> | <https://www.hcplive.com/view/fda-accepts-grants-priority-review-to-ax...>

**VERA | Score: 30.5 | Profile: binary\_catalyst | Stage: active**

**VERA — Vera Therapeutics — Atacicept IgAN BLA — PDUFA July 7, 2026**

Status: ACTIVE — Hold · Strategy: FDA PDUFA Calendar · Updated: 2026-04-16

**Key dates:** y 7, 2026, 2026-07-07, 2026-04-12, y 7 2026

**Rationale:** What the market sees: Another IgAN drug in a crowded field, behind sibeprenlimab (APRIL-only, approved Nov 2025, \$292.5K/yr), iptacopan, sparsentan, atrasentan, budesonide. Consensus models a modest commercial trajectory and values VERA primarily on the binary of FDA approval.

**RPAY | Score: 30.0 | Profile: activist\_governance | Stage: active**

**RPAY — Forager Fund vs Repay Holdings Poison Pill**

Status: Active — DUAL ACTIVIST (Forager + Veradace) · Strategy: EDGAR (governance keyword: "rights plan" + "poison pill") + · Identified: 2026-04-15 · Updated: 2026-04-16

**Key dates:** 2026-04-14

**Rationale:** On 2026-04-13, RPAY's board adopted a stockholder rights plan (poison pill) with an unusually aggressive 12.5% triggering threshold. The same day, activist hedge fund Forager Fund, L.P. (Birmingham, AL; managed by Robert MacArthur and Edward Kissel of Forager Capital Management, LLC) filed a SCHEDULE 13D/A Amendment No. 2 disclosing a 12.9% stake (11,106,648 shares) as of 2026-04-09.

## **AVNS | Score: 28.5 | Profile: merger\_arb | Stage: active**

### **AVNS — Merger Arbitrage (American Industrial Partners buyout @ \$25.00 cash)**

Status: ACTIVE CANDIDATE · Strategy: EDGAR Keyword Scanning (category: mna) · Identified: 2026-04-14 · Updated: 2026-04-16

**Rationale:** Standard cash merger arbitrage. AIP is a well-capitalized, operationally-focused industrials PE firm. Target is a mid-cap medical technology company with no direct product overlap with other AIP portfolio → antitrust risk minimal (standard HSR review expected to clear). No competing bidders flagged. Shareholder approval highly likely given 72.1% premium — substantially above typical premiums (30-40% for strategic deals, 40-55% for PE).

File: candidates/AVNS\_merger\_arb\_AIP\_2026-04-14.md

## **GSAT | Score: 25.5 | Profile: merger\_arb | Stage: active**

### **GSAT — Merger Arbitrage (Amazon acquisition @ \$90 cash / 0.321 AMZN share)**

Status: ACTIVE (S64 promoted from WATCHLIST — S-4 imminent, SC 13D/A activity observed) · Strategy: EDGAR Keyword Scanning (category: mna) · Identified: 2026-04-14 · Updated: 2026-04-16

**Rationale:** Large strategic acquisition with: - Deal risk level: MODERATE — not just because of size, but because of the satellite milestone contingency (a first-party execution risk unique to this deal) and FCC/DOJ scrutiny given spectrum concentration. - Shareholder approval: essentially locked (majority written consent obtained simultaneously with signing — a commonly-used structure where a major holder pre-commits; here likely Apple's ~20% stake plus insider / strategic holders suffices for majority).

## **SEM | Score: 22.5 | Profile: activist\_governance | Stage: active**

### **SEM — Select Medical Holdings WCAS+Ortenzio Take-Private (\$16.50 cash)**

Status: Watchlist — spread too tight for active candidate; monitor for blow-out triggers · Strategy: EDGAR keyword scanning (mna category — via S64 strength-5 ro · Identified: 2026-04-16 · Updated: 2026-04-16

**Rationale:** On 2026-04-15, SEM filed a PREM14A (accession 0001104659-26-043505) and SC 13E-3 (accession 0001104659-26-043531) disclosing a take-private transaction at \$16.50 per share all-cash. The buyer consortium is Welsh, Carson, Anderson & Stowe XIV, L.P. (WCAS) in partnership with the Ortenzio family (the founding family, via rollover equity). Merger Agreement was signed March 2, 2026. Corporate structure: Stallion Group Parent → Stallion Intermediate → Stallion MergerSub → merges with and into Select Medical Holdings, with Select surviving as a wholly-owned sub of the new private holdco.

## **RGR | Score: — | Profile: activist\_governance | Stage: active**

### **RGR — Beretta Holding Proxy Fight**

Status: ACTIVE — new candidate, created Session 62 (2026-04-15) · Strategy: Activist proxy contest (EDGAR) · Identified: 2026-04-15 · Updated: 2026-04-16

**Key dates:** y 27, 2026, 2026-05-27

**Rationale:** Beretta Holding S.A. (the Italian firearms conglomerate and Sturm Ruger's largest individual shareholder at 9.95% / 1,587,000 shares) has launched an activist proxy fight to replace five long-tenured directors on RGR's board at the 2026 Annual Meeting — an unusual industry-insider activist campaign with credible strategic leverage and asymmetric outcome distribution (settlement, board refreshment, or strategic transaction optionality), yet the stock has absorbed the Apr 7 PREC14A announcement with only a +4.2% drift and volume is *declining*, suggesting the market has not repriced for a plausi

## DELIVERED — 1 candidate(s)

**TVTX** | **Score: 30.5** | **Profile: binary\_catalyst** | **Stage: delivered**

### TVTX — FILSPARI sNDA PDUFA for FSGS (April 13, 2026)

Status: ■ APPROVED — thesis confirmed · Strategy: FDA PDUFA · Identified: 2026-04-09 · Updated: 2026-04-16

**Key dates:** | 13, 2026, 2026-04-13

**Rationale:** Travele Therapeutics faces an FDA decision on April 13, 2026 for the supplemental NDA (sNDA) seeking traditional approval of FILSPARI (sparsentan) for focal segmental glomerulosclerosis (FSGS). If approved, FILSPARI would be the first and only FDA-approved treatment for FSGS, a rare kidney disease that is a leading cause of kidney failure. FILSPARI is already approved for IgA nephropathy and has demonstrated benefit in FSGS through its Phase 3 DUPLEX trial.
