SANKEI REAL ESTATE Inc. (2972.XTKS) — Tiger LPS / Lion LPS Tender Offer Terms Update

> **STATUS: pending_deep_dive.** Automated-scanner stub. Do not act on this alone.

TL;DR

On 2026-04-14 a three-filing cluster on TDnet for Sankei Real Estate Investment Corporation (J-REIT, ticker 2972): Tiger LPS and Lion LPS have updated the terms of their public tender offer (■■■■■, TOB) for Sankei's investment units. Scanner classifies this as tender_offer, strength_estimate=5, thesis_direction=long, translation_confidence 0.92 (TOB pattern is unambiguous). Score 35 is immediate-route. Two sibling filings (progress report + correction notice) were merged by the convergence engine's hard rule (same issuer + same signal_type + same source_date).

Source signals

- [illegible]

The cluster suggests this is an **updated / revised** TOB — most interesting outcome if the update is a price increase (offer bump).

Translation notes

Japanese source. TOB (トビ, kōkai-kaisuke) is the Japanese tender-offer disclosure. Deep-dive must read the PDF to determine:

- Old vs. new offer price per investment unit
- Whether the acceptance period has been extended
- Acceptance rate to date (if disclosed)
- Whether the Sankei board's position has changed

Company context

- Market cap: \$368M USD (≈¥58B at 158.8 JPY/USD)
- Structure: J-REIT (Japanese Real Estate Investment Trust). Investment units trade on TSE REIT market (code 2972).
- Sector: Office-focused J-REIT associated with Sankei Shimbun / Fuji Media Holdings group.
- Trading status: N (normal) per scanner.
- Recent price action: TODO — deep-dive fetch 30/90-day.
- Unit-holder structure: J-REITs historically have high retail ownership; acceptance dynamics differ from corporate TOBs.

Thesis statement (to be completed by deep-dive)

Pending. Direction pre-tagged long — target REIT units generally rally to offer price on TOB announcements, and if this filing is an offer bump, there is further spread to close. Deep-dive must verify:

- What changed in the revised terms (price? acceptance threshold? period?)

- Who Tiger LPS / Lion LPS are (investment SPVs — look for ultimate beneficial owner; likely a private real-estate fund)
- Regulatory path: J-REIT TOBs involve FSA review but no separate competition clearance in most cases
- Sankei board position (recommended / neutral / opposed)
- Comparable J-REIT TOBs (Daiwa Office Investment 2016, Japan Hotel REIT 2020) for precedent timeline

Steelman of the opposite view

Pending deep-dive. Possible angles:

- Terms revision is negative (price cut or threshold raise) — offer struggling
- Sankei board opposition; management-side defensive plan (white-knight, scheme to prevent change of control)
- Underlying NAV of the portfolio drops below offer price on re-appraisal
- Tiger/Lion LPS acceptance conditions are not met; offer lapses and units fall back

Web research layer (mandatory — pending)

- Nikkei / Reuters coverage of Sankei Real Estate TOB
- Tiger LPS / Lion LPS identity (search J-REIT custodian filings, SPV filings)
- J-REIT analyst coverage (SMBC Nikko, Mitsubishi UFJ Morgan Stanley, Mizuho)
- Sankei board rationale and independent advisor opinion
- JPX REIT Index weighting / ETF inclusion impact if delisted

Kill conditions

- **Kill 1:** Terms revision is a price cut. Flip thesis or cut position to 0.
- **Kill 2:** Sankei board recommends rejection. Elevated break risk.
- **Kill 3:** Acceptance rate below threshold at period expiry. Observable in final acceptance filing.
- **Kill 4:** Counter-bid from a white-knight J-REIT at a lower price but with structural preference. Observable in new Rule 27 TDnet filing.
- (refine with specific JPY thresholds during deep-dive)

Catalyst map (skeleton)

Event	Date/Window	Entry trigger	Exit trigger
	----- ----- ----- -----		
TOB amendment effective date	T+0	N/A	-
Sankei board response	T+5 to T+10	-	-
Acceptance period close	Per amended terms	-	Settle to cash
Payment / settlement	T+30 typical	-	-

Position sizing

Satellite-arbitrage (2-5%). J-REIT liquidity is generally good on TSE REIT market. Arbitrage spread tight if offer is well-received; wider if board pushback creates break risk. Size to acceptable annualized IRR given days-to-close.
