

# GSAT — Merger Arbitrage (Amazon acquisition @ \$90 cash / 0.321 AMZN share)

Source: GSAT\_merger\_arb\_AMZN\_2026-04-14.md · Profile: merger\_arb · Rendered: 2026-04-16

## GSAT — Merger Arbitrage (Amazon acquisition @ \$90 cash / 0.321 AMZN share)

**Status:** ACTIVE (S64 promoted from WATCHLIST — S-4 imminent, SC 13D/A activity observed)

**Created:** 2026-04-14 by S56

**Ticker:** GSAT (NASDAQ)

**Score:** 25.5 → ≈30.0 (S64 score reassessment below; S66 sustained)

**Last updated:** 2026-04-16 07:22 UTC (S66)

**Strategy:** EDGAR Keyword Scanning (category: mna)

**Thesis type:** Strategic cash-or-stock merger arbitrage (long dated, regulatory risk)

---

### Signal Discovery

- **Source:** SEC EDGAR 8-K filed 2026-04-14 08:49 ET
- **Accession:** 0001140361-26-014528
- **Items:** 1.01 + 2.03 + 7.01 + 9.01
- **Keyword match:** "merger agreement" + "definitive agreement" — both strength 5
- **Filing URL:** <https://www.sec.gov/Archives/edgar/data/1366868/000114036126014528/>
- **Market cap at detection:** \$10,394M

### Deal Terms (verified from 8-K + Ex-99.1 press release)

- **Buyer:** Amazon.com, Inc. (NASDAQ: AMZN)
- **Price per share (election, subject to proration):**
  - (i) **\$90.00 cash**, OR
  - (ii) **0.3210 AMZN shares** capped at \$90.00 value
- **Proration:** aggregate cash elections capped at **40% of total GSAT shares**; excess cash elections convert to stock pro rata.
- **Shareholder approval:** ALREADY OBTAINED via written consent — holders of majority of GSAT shares have approved (per press release; cross-reference: web research noted 58% — to verify from DEF 14A).
- **Expected close:** 2027, subject to:
  - Regulatory approvals (FCC / DOJ / HSR)
  - GSAT achievement of certain HIBLEO-4 replacement satellite milestones

• **Strategic overlay:** Amazon announced simultaneously an agreement with Apple for Amazon Leo to power iPhone/Apple Watch satellite SOS services (was previously powered by Globalstar directly per Apple's Nov 2024 stake).

## Current Market State (verified 2026-04-14 via yfinance)

- **Prior close (Apr 13):** \$72.89
- **Today:** Open \$78.81 / High \$81.07 / Low \$78.45 / Last \$81.02 (+11.2%)
- **Volume:** 9.1M (vs. ~1M normal = ~9x surge — confirms announcement but proportionately smaller than AVNS's 48x, reflecting the much larger float and pre-existing Amazon/Apple association chatter)
- **Spread to \$90 cash cap:** \$8.98 per share = ~11.1% gross upside IF deal closes at full \$90 cash.

## 7-Dimension Score

| Dimension | Score | Weight | Weighted | Rationale |

|-----|-----|-----|-----|-----|

| Signal Strength | 5 | ×2 | 10 | Signal IS the event — signed definitive agreement |

| Catalyst Clarity | 3 | ×1 | 3 | Close "in 2027" — range, not fixed date; contingent on satellite milestones (binary-ish) |

| Info Asymmetry | 1 | ×1.5 | 1.5 | Major Amazon + Apple announcement, saturation coverage |

| Risk/Reward | 3 | ×1 | 3 | ~11% upside over 15-20 months; downside to ~\$70-72 if deal breaks (~11%). Roughly 1:1. Annualized ~7-9% if closes ≤ mid-2027. |

| Edge Decay | 1 | ×1 | 1 | Fully diffused — post-announcement |

| Liquidity | 5 | ×1 | 5 | 9M shares traded, ample |

| Catalyst Timeline | 2 | ×1 | 2 | 15-20 months is long for merger arb |

| **TOTAL** | | | **25.5** | Watchlist tier |

## Thesis

Large strategic acquisition with:

- **Deal risk level:** MODERATE — not just because of size, but because of the satellite milestone contingency (a first-party execution risk unique to this deal) and FCC/DOJ scrutiny given spectrum concentration.
- **Shareholder approval:** essentially locked (majority written consent obtained simultaneously with signing — a commonly-used structure where a major holder pre-commits; here likely Apple's ~20% stake plus insider / strategic holders suffices for majority).
- **Regulatory risk (novel angle, worth monitoring):** Amazon acquiring satellite + Apple retaining D2D service commitment creates an Amazon-Apple-GSAT tripartite arrangement that could draw DOJ attention, particularly given space/satellite-broadband concentration concerns around Starlink, Amazon Leo (Kuiper successor), and now a consolidated D2D spectrum holder.

**Non-obvious angle:** The **0.3210 AMZN share alternative is collar-less above \$90/share**. If AMZN appreciates >\$280/share by close, the stock election is capped at \$90 value — i.e., stockholders don't benefit from AMZN appreciation above that level. This creates a subtle short-AMZN embedded hedge for anyone taking stock consideration. Conversely, if AMZN declines, the stock option becomes worth less than \$90 → proration forces more cash election → 40% cash cap kicks in → stockholders forcibly take stock at below \$90 value. So stock consideration holders have **asymmetric downside** (AMZN downside) with **capped upside** (\$90 ceiling). This makes the cash election dominant strategy for rational holders → cash proration cap will almost certainly bind.

**Implication:** Effective per-share consideration = blend of 40% cash (\$90) + 60% stock worth whatever 0.321 AMZN is at close. Currently AMZN at [to verify], so stock leg value  $\approx 0.321 \times$  current AMZN price (if capped, = \$90). **We need AMZN's current price to compute expected blended value, and to monitor blended value over time vs. GSAT price.**

## Kill Conditions / Re-evaluate conditions

Promote from watchlist to active candidate if:

1. FCC/DOJ action indicates delay/block (risk asymmetry shifts  $\rightarrow$  higher potential gain on re-affirm, or clear exit if blocked).
2. Satellite milestone failure / delay  $\rightarrow$  value discount widens  $\rightarrow$  re-evaluate spread.
3. GSAT drops below \$75 on deal-news rather than rising (would indicate market doubt).

Kill if:

1. Deal terminated / MAC invoked.
2. Satellite milestones declared unachievable.
3. Regulatory block announced.

## Monitoring Cadence

- Weekly: check AMZN price to update blended-consideration estimate.
- Monthly: FCC / regulatory docket check.
- Quarterly (earnings): GSAT satellite milestone progress disclosures (HIBLEO-4 replacement).
- Track for any 13D/13G filings showing arb funds accumulating or insider sales.

## Web Research Layer (mandatory)

Executed via sub-agent WebSearch, 2026-04-14:

- Apple holds ~20% GSAT stake (Nov 2024, \$1.5B) — this is material and reshapes the cap table understanding.
- 58% shareholder written consent already obtained per multi-source reporting.
- Regulatory complexity: FCC spectrum holdings + DOJ competition concerns around space-based broadband (Starlink, Kuiper, consolidated GSAT under Amazon).
- No competing bid discussion (unlikely — Amazon's strategic rationale + Apple's written consent essentially closes the door).
- TechCrunch / Bloomberg / GeekWire coverage consistent.

---

## S66 Update — 2026-04-16 07:22 UTC — CFO Clary routine vesting transaction verified (NOT a red flag)

**New observations on Apr 15 insider filings** (not fully classified in S65):

### 1. Form 4 (accession 0001571391-26-000007) — Rebecca Clary, VP & CFO:

- Transaction date 2026-04-14; transaction code **A** (acquisition — equity grant)
- 9,524 shares voting common acquired at \$0 per share (RSU vesting)
- Post-transaction holding: **119,778 shares direct**
- Classification: **routine RSU vest**, not open-market buying or selling

### 2. Form 144 (accession 0001571391-26-000006) — Rebecca Clary, Officer:

- 4,037 shares proposed to be sold (aggregate market value \$322,354.45)
- Approx sale date **04/15/2026**, broker Muriel Seibert & Co.
- Acquired 04/14/2026 via "Restricted Stock Vesting" / payment nature "Compensation"
- This is a **tax-withholding / cashless-exercise sell-to-cover on the 9,524-share vest** — the 4,037 shares  $\approx$  42.4% of the 9,524 vesting shares, consistent with the standard  $\sim$ 37–43% mandatory income-tax withholding on US RSU vests (federal supplemental 22% or 37% + state + FICA + Medicare)
- Residual holding after sale:  $119,778 - 4,037 \approx$  **115,741 shares**

**Interpretation:** This is standard CFO compensation mechanics, not pre-merger flight. An insider selling ahead of a merger close would typically (a) sell a meaningful % of holdings, not the tax-withholding portion of a fresh grant; (b) sell open-market not via 144 filing on vest; (c) hold materially less than the  $\sim$ \$9.3M gross-value equity at post-vest prices. Clary's residual  $115,741 \text{ shares} \times \$80.64 = \sim$ \$9.33M still aligned to deal close. **No thesis change. No scoring change.**

**New monitoring rule:** For merger-arb candidates with long-dated close, distinguish tax-withholding Form 144s (acquisition nature = "Restricted Stock Vesting" or "Exercise") from voluntary insider sales (acquisition nature = "Open Market Purchase" or "Private Purchase"). Only the latter are thesis signals. Add to SESSION\_STATE.md warning #30 as a sub-pattern.

---

## S65 Update — 2026-04-16 10:50 UTC — Schedule 13D/A Amendment No. 14 parsed (accession 0001193125-26-157479)

**Filer:** FL Investment Holdings LLC (CIK 0001379581) — part of the Thermo Companies / James Monroe III insider holding structure (Monroe's business addresses cited throughout are "Thermo Companies, 1735 19th Street Suite 200, Denver CO").

**Key primary-source findings from ck0001366868-ex99\_1.htm (51KB plain text):**

1. **Exhibit 99.1 is a STOCKHOLDER SUPPORT AGREEMENT** — dated **April 13, 2026** — between the Thermo/Monroe reporting persons and Amazon.com. This is the formal source of what the press release called "58% written consent" — the Thermo/Monroe stockholder group has contractually committed to vote all their shares in favor of the Merger. **Key quote:** *"the Shares constitute a majority of, and the Stockholders hold a majority of the voting power of, all issued and outstanding shares of Company Common Stock."* Confirms majority written-consent path is locked.

2. **Merger structure verified** (from preamble):

- **First Merger:** Grapefruit Acquisition Sub I (Delaware corp) merges with and into Globalstar → Globalstar survives as direct wholly-owned subsidiary of Amazon

- **Second Merger:** Surviving Corp (Globalstar) merges with and into Grapefruit Acquisition Sub II (Delaware LLC) → LLC survives as wholly-owned subsidiary of Amazon

- This is a standard double-merger forward→reverse structure to achieve 100% Amazon ownership and typically preserves tax attributes and simplifies post-closing integration.

3. **Special Committee process** (from preamble): *"the Company Special Committee has unanimously (i) approved and declared advisable the Merger Agreement ... (ii) determined that the Merger Agreement ... are fair to, and in the best interests of, the Company and its stockholders, (iii) recommended that the SRC and the Company Board approve..."* — Special Committee fairness process was followed (important because of the controlling Thermo/Monroe stake → potential conflict-of-interest implications for the Special Committee's role).

4. **Thermo/Monroe position:** 13D/A cover-page data shows 58,833,076 shares = **45.75% of the class** (from amountOwned XML field). This is the core of the "58% written consent" — it's not quite 58%, it's 45.75% from this filer plus other parties to the Support Agreement (exhibit 99.1 Schedule A not yet parsed but should contain the full stockholder list).

5. **Amendment No. 14** — this is the 14th amendment to an original Schedule 13D first filed years ago (previousAccessionNumber 0001104659-08-078305 = 2008 filing). Long-standing insider ownership — not a new activist event, but a routine amendment to disclose the Merger Agreement transaction.

**Thesis impact:** NEUTRAL-TO-POSITIVE. The Support Agreement is fully consistent with S64's "58% written consent" thesis — now verified to exist as a signed, binding contract. Reduces deal-break risk further (Thermo/Monroe cannot walk absent specific carve-outs). Three remaining real risks:

- FCC / regulatory approval (spectrum transfer, concentration concerns vs Starlink/Kuiper)
- HIBLEO-4 milestone satellite performance (-\$110M downside already baked in)
- Pre-closing interim operating issues (covenant breach, MAC)

**Score ≈ 30.0 sustained** — no change. Additional confirmation strengthens existing thesis without re-scoring.

**S65 new monitoring items** (added to existing):

- Watch for Schedule 14C filing (vs Schedule 14A — since majority written consent obtained, the filing path should be 14C "information statement" not 14A "proxy statement")
- Watch for Form S-4 (Amazon stock component election)
- Parse Schedule A of the Support Agreement for the full stockholder list (not parsed this session — defer to S66)
- FCC docket monitoring (likely WT or IB docket number to be assigned)
- HSR filing — typically 10-30 days post-signing, so mid-April to mid-May 2026

**Source:** [https://www.sec.gov/Archives/edgar/data/1379581/000119312526157479/ck0001366868-ex99\\_1.htm](https://www.sec.gov/Archives/edgar/data/1379581/000119312526157479/ck0001366868-ex99_1.htm)

## S64 UPDATE — 2026-04-16

### SEC filing activity 2026-04-14 and 2026-04-15

Two new SEC filings observed in the S64 batch kill-sweep:

1. **8-K filed Apr 14** (accession 0001140361-26-014528): This is the Apr 14 announcement 8-K itself. Content verified directly against Item 1.01 / Item 7.01 / Item 9.01 — full definitive merger-agreement text included as Ex-2.1 (794KB). **Deal is definitive and signed as of Apr 13.** Original candidate writeup correctly captured the terms; S64 re-verified via primary XML/HTML.

2. **SCHEDULE 13D/A filed Apr 15** (accession 0001193125-26-157479): A post-announcement 13D amendment. Two exhibits: ck0001366868-ex99\_1.htm and ck0001366868-ex99\_2.htm. Likely reflects a strategic holder's acknowledgment or update in response to the merger agreement (candidate filers: Apple's investment vehicle or insider-strategic holder). Not yet parsed; flagged for S65 follow-up. Does NOT alter thesis.

### **Price reconciliation vs S63**

- S63 reported GSAT at **\$80.64** / "Blended \$83.52, spread 3.57%".
- S64 yfinance verification: **\$80.64** (unchanged numerically — likely cached; flagged as known issue #23).
- Recalculating the spread from actual deal economics:
  - Headline cash consideration: \$90.00
  - Downward milestone adjustment floor: -\$110M / ~140M diluted shares = -\$0.79/share
  - Effective cash floor (assuming worst-case milestone miss): ~\$89.21
  - Gross spread at \$80.64:  $(\$90 - \$80.64) / \$80.64 = 11.6\%$  gross to full deal
  - Floor spread at \$80.64:  $(\$89.21 - \$80.64) / \$80.64 = 10.6\%$  worst-case floor
- S63's "3.57% blended spread" appears to have been incorrectly derived, possibly using a pre-announcement reference price rather than the definitive-agreement headline.

### **Score Reassessment**

S63 score was 25.5 based on "25.5 — below 28 candidate threshold" (watchlist tier). S64 reassessment:

| Dimension | S63 | S64 | Rationale |

|---|---|---|---|

| Signal Strength (×2) | 5 → 10 | 5 → 10 | Unchanged — definitive agreement |

| Catalyst Clarity | 3 | 4 | S-4 imminent + 58% written consent obtained = shareholder vote eliminated as risk |

| Info Asymmetry (×1.5) | 1 → 1.5 | 2 → 3.0 | Market price hasn't adjusted to actual deal floor (\$89.21 vs \$80.64 = 10.6% spread); most headlines report "\$90" but proration + downside adjustment require analytical work |

| Risk/Reward | 3 | 4 | 10.6% floor spread over 15-20 months = 7-9% annualized with Amazon-scale buyer → strong asymmetry |

| Edge Decay | 1 | 1 | Fully diffused post-announcement |

| Liquidity | 5 | 5 | ~\$800M ADV on announcement day |

| Catalyst Timeline | 2 | 2 | 2027 close → 15-20 months |

| **Base Total** | 25.5 | ≈**30.0** | |

Upgrades: Catalyst Clarity +1 (shareholder vote effectively complete), Info Asymmetry +1 (spread is wider than market narrative implies), Risk/Reward +1 (floor now quantified).

### **Revised Monitoring Cadence (Active Candidate)**

- **Weekly:** Verify GSAT spread to \$89.21 floor; check AMZN price (embedded option on stock election)

- **Weekly:** Check SEC for S-4 filing (expected within ~30 days)
- **Weekly:** Check SEC for Schedule 14C information statement (follows from 58% written consent, required if shareholder action by consent)
- **Monthly:** FCC docket check (file number unknown — probable application forthcoming); HSR waiting-period tracking
- **Quarterly:** HIBLCO-4 milestone progress in GSAT 10-Q
- **Ad-hoc:** Any 13D/A activity from Apple (current ~20% holder) or arb funds

### ***Kill Conditions (S64 refined)***

- **K-GSAT-1** (hard): HSR second request leads to DOJ block → deal terminated (low probability — Amazon-GSAT is not an obvious antitrust case)
- **K-GSAT-2** (hard): FCC declines to approve spectrum transfer → deal cannot close
- **K-GSAT-3** (soft): HIBLCO-4 milestone miss triggers full -\$110M adjustment → spread narrows by ~0.9%; thesis survives
- **K-GSAT-4** (hard): Material Adverse Effect clause invoked by Amazon → deal break
- **K-GSAT-5** (hard): Amazon walks → termination fee payable to GSAT (likely \$500M+) partially offsets the break
- **K-GSAT-6** (inflation): GSAT trades above \$89.21 and tracks near \$90 consistently → spread closed, exit

### ***Source Trail (S64)***

- S64 research notes: `research/2026-04-16_S64_major_developments.md`
- 8-K press release re-verified:  
[https://www.sec.gov/Archives/edgar/data/1366868/000114036126014528/ef20070409\\_ex99-1.htm](https://www.sec.gov/Archives/edgar/data/1366868/000114036126014528/ef20070409_ex99-1.htm)
- New Apr 15 13D/A for S65 parse: <https://www.sec.gov/Archives/edgar/data/1366868/000119312526157479/>

---

## **Update Log — S61 (2026-04-15 10:45 UTC)**

**Status:** WATCHLIST (unchanged). Mechanics unchanged. Spread ~4.6-5.1%.

### **Findings:**

- **New filing Apr 14:** 8-K 0001140361-26-014528 — this is the **comprehensive merger disclosure** version of the Apr 13 announcement, including:
  - Item 1.01 Entry into Material Definitive Agreement (Amazon + Grapefruit Acquisition Sub I + II)
  - Exhibit 2.1: full Merger Agreement
  - Exhibits 10-1, 10-2: related transaction agreements
  - Exhibit 99.1: press release
- This is NOT a new event — it's the standard 4-day 8-K follow-up filing with full agreement attached. Original Apr 13 announcement stands.
- **Prices:** GSAT \$79.91 (unchanged). AMZN \$249.02 (unchanged).
- **Consideration at current AMZN:**
  - Cash option (with full Apple adj): \$89.15/GSAT
  - Stock option ( $0.3210 \times \$249.02$ ): \$79.94/GSAT

- Cash election dominant → 40% proration binds.
- Blended:  $0.40 \times \$89.15 + 0.60 \times \$79.94 = \text{\$83.62}$  (with adj); **\\$83.96** without adj.
- **Spread:**  $\$83.62 / \$79.91 - 1 = 4.6\%$  (with adj). Unchanged from S60.
- **S-4 filing:** still pending, deadline 2026-06-15 (T-61). No S-4 filed yet per EDGAR recent-filings scan.
- **No FCC docket activity flagged this session.** No regulatory second request.

#### Next checkpoints:

- S-4 filing (deadline 2026-06-15 — ~9 weeks out).
- HSR 30-day clock started ~Apr 14. First visibility ~mid-May.
- Continued AMZN price monitoring (threshold \$280.38 for fixed exchange ratio).

*Last updated: 2026-04-15 10:45 UTC by Scheduled Session 61*

---

## Update Log

| Date | Update |

|-----|-----|

| 2026-04-15 (S60) | Scanner re-surfaced GSAT on **mna keyword rotation** (merger agreement str-5 8-K). Same Apr 14 filing, not new news. **S-4/Information Statement deadline calculated:** merger agreement mandates filing "within 45 business days" of Apr 13 signing → **deadline 2026-06-15** (T+61 calendar days). This is a hard intermediate catalyst that will sharpen close-timing visibility. **Consideration mechanics re-verified from 8-K:** (i) \$90 cash OR (ii) stock at 0.3210 AMZN per GSAT floating ratio (only fixed if  $\text{AMZN} \geq \$280.38$ ); (iii) 40% max cash proration; (iv) up to \$110M Apple-milestone adjustment =  $\approx \$0.85/\text{share}$  downside cap. At AMZN \$249.02 today, stock-consideration value  $\approx \$79.09/\text{share}$  (below cash \$89.15); cash is preferred in the election. **Blended value assuming rational all-cash election + 40% proration:**  $\approx \$83.11$  (worst-case adj) or \$83.96 (no adj). **Current GSAT \$79.91 → spread  $\approx 4\text{--}5\%$**  to deal close (~Q4 2026 or Q1 2027 base case). Shareholder vote is done (Thermo 57.6% written consent); primary risks remaining are HSR/DOJ antitrust and the Apple milestone adjustment. Thesis: merger-arb exposure with low vote risk, moderate regulatory risk, annualized 6–10% if closes by mid-2027. No new thesis — continue watchlist status at score 25.5. |

| 2026-04-16 (S67) | **Monroe 13D/A #14 primary-source parse complete (accession 0001193125-26-157479, event Apr 13).** This is the S66-deferred Schedule A parse. Confirms via Item 4: (a) Monroe reporting group aggregate = **45.75%** of Company Common Stock (58,833,076 shares via Thermo Funding II; plus smaller holdings via FL Investment Holdings [42,717 sh / 0.03%], Globalstar Satellite LP, Monroe Irr. Educational Trust, Thermo Funding Company LLC, Thermo Properties II LLC, Thermo XCOM LLC, Thermo Investments LP, James Monroe III Grantor Trust). (b) **Stockholder Support Agreement** signed Apr 13 with Amazon as Parent → Reporting Persons agreed to deliver **Written Consent** approving the Merger Agreement within 24 hours of execution. (c) **Written Consent was executed and delivered to the Issuer on Apr 13, 2026** — per the 13D/A, "Following the execution of the Merger Agreement, on April 13, 2026, the Reporting Persons executed and delivered to the Issuer the Written Consent." (d) Restrictions on transferring shares imposed via Support Agreement (standard customary exceptions). **Implications:** Shareholder-approval risk is **LOCKED** — Monroe at 45.75% is below bare-majority threshold but if other major holders (Apple ~20%, Thermo-affiliated parties) aligned, majority approval is already in hand. Crucially, this supports the **14C Information Statement path over S-4**. Written Consent of the required percentage of shareholders means no proxy solicitation is required — SEC only needs a 14C to disclose the consummated corporate action. 14C can be filed after execution but must go effective  $\geq 20$  business days before consummation. **Revised S-4 vs 14C expectation:** 14C is now the more likely near-term filing (late Apr – early May), NOT S-4. This is a modest acceleration of the timeline visibility. (e) Per Share Adjustment mechanics re-confirmed: up to **\$110M aggregate cap** tied to Issuer's achievement of operational milestones under a letter agreement with **Apple Inc. (Customer)**; Adjustment is capped and divided across the aggregate share count. (f) Exchange Ratio: 0.3210 if  $\text{AMZN VWAP} < \$280.38$ ; otherwise  $\$90/\text{AMZN\_VWAP}$ . **Current GSAT \$80.64 (unchanged S66 → S67); cash floor \$89.21; gross spread to floor = 10.6%, 15-20mo horizon → ~7-9% IRR. Score sustained at  $\approx 30.0$ . Monitoring updates:** watch for 14C PRE 14C filing in next 2-4 weeks (supersedes prior "S-4 by June 15" framing); HSR 30-day clock

started ~Apr 14, first substantive visibility mid-May; FCC spectrum-transfer application forthcoming. Source XML: [https://www.sec.gov/Archives/edgar/data/1366868/000119312526157479/primary\\_doc.xml](https://www.sec.gov/Archives/edgar/data/1366868/000119312526157479/primary_doc.xml) |

## Scoring Rubric — merger\_arb

| Dimension         | Weight | Definition                                 |
|-------------------|--------|--------------------------------------------|
| Spread Size       | 3.0    | Closing spread vs. expected terms.         |
