RGR · RGR — Beretta Holding Proxy Fight

Stage: **ACTIVE** | Strategy: Activist proxy contest (EDGAR) | Score: — | Next catalyst: 2026-05-27 (T+40) | Urgency: **HIGH**

Beretta Holding has filed a proxy fight AND proposed a \$44.80/share partial tender offer (+20% premium) for 20.05% of Sturm Ruger — AGM May 27, 2026; the poison-pill waiver vote is the binary. → Potential outcomes: board waives pill + tender executes (+10-20%), negotiated settlement with board seats (+8-15%), proxy fight won by Beretta (+20-35%), or Beretta loses and stays as 9.95% holder (-5-10%).

HYPOTHESIS (the specific bet)

At or before Ruger's May 27, 2026 AGM, either (a) the board waives the October 2025 poison pill to let Beretta's \$44.80 tender proceed (converging stock toward \$44.80 + strategic premium), or (b) Beretta's 4-person slate succeeds, triggering pill removal + tender — in both cases stock re-rates significantly from \$41.98.

THESIS (why we believe it, in plain English)

A proxy fight = a shareholder nominates their own board candidates seeking to replace incumbents. Beretta Holding — the family-controlled Italian conglomerate that owns Beretta firearms, Benelli, and Sako — accumulated a ~10% stake in Sturm Ruger (RGR) and filed proxy materials to nominate their own slate. Ruger is the iconic American firearms maker. The filing signals either (a) Beretta wants consolidation in the global firearms industry, (b) Beretta sees RGR as strategically undervalued and wants operational changes, or (c) Beretta is positioning for a larger stake or acquisition. Any of these resolutions tends to be stock-positive: Beretta wins and pushes changes; RGR settles with board seats; or a strategic transaction is announced.

EXPECTED OUTCOME (what happens if we're right)

Most likely: Beretta + Ruger negotiate a settlement before the AM — Beretta gets 2-3 seats and governance concessions, stock +10-20%. Less likely but higher value: strategic transaction announced (+25-40%). Downside bounded: even if Beretta loses the vote, the 10% stake is a floor.

PRICE TARGETS

Reference	\$41.98 (2026-04-17 intraday)
Upside (base)	\$46-50 (+10% to +20%) — negotiated settlement with board seats
Upside (best)	\$52-58 (+25% to +40%) — strategic transaction / consolidation
Downside	\$38-40 (-5% to -9%) — Beretta loses vote but stays as holder

TIME SENSITIVITY **[HIGH]**

MEDIUM-HIGH — AM date not yet fixed (placeholder in filings). Historically late April to early May; contest filing pattern suggests late May or June 2026. Ruger's DEF 14A (company's definitive proxy) will set the date — expected within 2-4 weeks. Enter now while volume is still low; window narrows once the date is announced.

KILL WATCH (what would invalidate the thesis)

Beretta withdraws proxy materials without a settlement. ISS + Glass Lewis both recommend AGAINST Beretta's slate. Ruger adopts poison pill with exclusionary trigger. Firearms-sector liability verdict shocks RGR fundamentals.

Background & detail (source markdown)

The section below is the longer analyst note for RGR. The card on the preceding page is the decision-ready summary.

RGR — Beretta Holding Proxy Fight

Ticker: RGR (Sturm, Ruger & Company, Inc.)

Score: ~33.5 / 42.5 (estimated — see breakdown below; mandatory web-research layer pending next session)

Status: ACTIVE — new candidate, created Session 62 (2026-04-15)

Strategy: Activist proxy contest (EDGAR)

Origin signal: edgar scanner, 2026-04-15 activist-keyword "board representation" in PRER14A (rev. preliminary proxy)

One-line thesis

Beretta Holding S.A. (the Italian firearms conglomerate and Sturm Ruger's **largest individual shareholder at 9.95% / 1,587,000 shares**) has launched an activist proxy fight to replace five long-tenured directors on RGR's board at the 2026 Annual Meeting — an unusual industry-insider activist campaign with credible strategic leverage and asymmetric outcome distribution (settlement, board refreshment, or strategic transaction optionality), yet the stock has absorbed the Apr 7 PREC14A announcement with only a +4.2% drift and volume is *declining*, suggesting the market has not repriced for a plausible board turnover or strategic outcome.

Situation summary

Filings timeline (primary source: EDGAR CIK 0000095029 for RGR; CIK 0000921895 = Olshan Frome Wolosky LLP, activist law firm filer):

| Date | Filing | Filer | Significance |

|-----|-----|-----|-----|

| 2026-04-02 | Form 3 | — | New insider filings (likely Beretta participants registering beneficial ownership) |

| 2026-04-06 | DFAN14A | Olshan (Beretta) | Definitive additional contest proxy materials — pre-launch |

| 2026-04-07 | **PREC14A** | Olshan (Beretta) | **Preliminary contest proxy** — official proxy fight launch |

| 2026-04-07–10 | Form 3, Form 4 | Various | Participant beneficial-ownership disclosures |

| 2026-04-08 | DFAN14A | Olshan (Beretta) | Additional contest materials |

| 2026-04-15 | **PRER14A** | Ruger | **Revised preliminary proxy** filed by the Company — response to the contest |

Participants in Beretta's slate: Beretta Holding S.A., **Michael N. Christodolou**, **William F. Detwiler**, **Mark W. DeYoung**, **Fredrick D. DiSanto** (four nominees).

Stated thesis (from PREC14A): "The Company is overseen in a manner consistent with your best interests and free from the decades-long undue influence of five (5) long-tenured directors who collectively have an extremely small stake in the Company."

Annual Meeting: 2026 Annual Meeting of Stockholders, **date still TBD** (preliminary filings show [●] placeholder). Historically RGR's AM is in late April / early May, but the contest filing pattern suggests it has been pushed to late May or June 2026.

Why this is non-obvious / under-priced

1. **Industry-insider activist** is unusual — Beretta is not a typical hedge fund filer. It's an Italian family-controlled firearms conglomerate competing globally with Ruger. The strategic overlap creates nuanced possibilities (strategic alliance, cross-license, minority-to-control path, consolidation) that generic activist-fund screens will miss.
2. **Price reaction has been muted**: From Apr 7 close \$40.63 → Apr 15 close \$42.35 = **+4.2%** over 8 trading days. For comparison, even modest activist campaigns at sub-\$1B mcap companies typically see +8–15% on a successful slate filing. The move here is consistent with passive readers registering the news but no re-pricing for outcomes.
3. **Volume declined** post-announcement (peak 439K on Mar 25, down to 71K on Apr 15 — the lowest volume of the 45-day window, on the day the Company filed its PRER14A response). Absence of institutional repositioning.
4. **Beretta owns ~10%**. That's a large, stable, motivated holder with deep industry credibility and capital — a profile that historically produces either settlement (seats + governance concessions) or escalation (tender, strategic transaction).
5. **Olshan Frome Wolosky** is a tier-1 activist law firm — does not take on non-serious campaigns. Their involvement signals Beretta intends to see this through.

Score breakdown (estimated — needs mandatory web-research layer)

| Dimension | Weight | Score | Notes |

|-----|-----|-----|-----|

| Signal Strength | ×2 | 5 (×2=10) | Live, filed, large shareholder, credible participants, top-tier activist counsel |

| Catalyst Clarity | 1 | 5 | Annual Meeting vote is a binary catalyst with a fixed date (TBD but bounded) |

| Info Asymmetry | ×1.5 | 3 (×1.5=4.5) | Filings are public; but activist profile, strategic optionality, and muted market reaction together still under-priced |

| Risk/Reward | 1 | 3 | Asymmetric — settlement/refresh scenarios +10–20%; downside limited by industry fundamentals and Beretta's 10% floor |

| Edge Decay | 1 | 3 | Moderate — once AM date is set (expected soon) edge decays as proxy-fight narrative builds |

| Liquidity | 1 | 4 | \$675M mcap, ADV acceptable though not heavy |

| Catalyst Timeline | 1 | 4 | Expected 30–60 days to AM (May–June 2026) |

| **Total (pre-conv) | | ≈33.5 | Above 28 threshold — qualifies as Active Candidate |**

Convergence bonus: 0 (single-strategy signal, no EDGAR convergence with other scanners).

Kill conditions (must monitor each session)

- **K-1**: Beretta settles for board observer rights only (not full board seats) with no governance concessions — drops thesis strength materially; would demote to Watchlist.
- **K-2**: Beretta withdraws the proxy contest without settlement — kills thesis outright.
- **K-3**: A "white knight" / strategic buyer emerges and announces a transaction that supersedes the proxy fight — may be net-positive but changes thesis entirely; re-underwrite.
- **K-4**: ISS/Glass Lewis recommends against Beretta's slate unanimously — materially weakens vote probability.

- **K-5:** Company files a Rights Plan or structural defense materially impairing Beretta's position — thesis stays but risk/reward skews.
- **K-6:** Material firearms-sector regulatory event or civil-liability verdict during the window that takes RGR fundamentals down — exits regardless.

Catalyst map

| Event | Estimated date | Trigger |

|-----|-----|-----|

| Ruger DEF 14A (company proxy) | T0 | Triggers fixing of AM date; activist position formalized |

| ISS / Glass Lewis recommendations | T-14 to T-10 from AM | Major vote driver |

| Potential settlement (most common outcome) | Any day before vote | 60–70% historical base rate for campaigns with a 10% activist |

| Annual Meeting vote | AM date (TBD — estimated late May / June 2026) | Binary catalyst |

Mandatory web-research layer (PENDING — next session)

Research tasks that must be completed before any position is sized:

1. **Beretta Holding profile** — ownership structure, capital resources, public statements, prior Ruger involvement history (did Beretta previously attempt investment/JV in Ruger?)
2. **Director nominees' backgrounds** — Christodolou (former Tocqueville), Detwiler, DeYoung, DiSanto. Are they credible? Have they served on public boards of US firearms / consumer industrials companies?
3. **ISS / Glass Lewis commentary** — have either of the proxy advisers indicated early positioning?
4. **Sell-side research** — have any analysts downgraded / upgraded RGR on the proxy contest? PT changes?
5. **Industry angle** — any recent firearms-sector M&A activity (SWBI, VSTO, AOUT) that could contextualize Beretta's move?
6. **Legal dockets** — is there any civil/litigation exposure on RGR not otherwise priced?

Update log

Session 63 — 2026-04-15 22:25 UTC — **MAJOR UPDATE: Web-research layer reveals tender offer + Pill exemption ask**

Critical findings from EDGAR primary-source review (S62 missed these — campaign began earlier and is broader than proxy contest alone):

1. **Beretta filed SC TO-C on Mar 25, 2026** (Schedule TO preliminary tender-offer communication — NOT yet commenced). Beretta intends to launch a **partial tender offer for up to 20.05% of RGR shares it does not already own**, which would take Beretta from 9.95% → ~30%.
2. **Tender price: \$44.80/share cash** — premium of ~20% to RGR's 60-day VWAP (per Beretta's letter to the Board dated Mar 25, 2026).

3. **Current price \$42.35 trades 5.79% BELOW the proposed tender price of \$44.80** — this is the cleanest expression of the mispricing. Even if the tender clears at the Pill exemption and at full proration, an arbitrage holder captures the spread proportionally.

4. **Poison Pill blocks the tender.** RGR's Board adopted a "temporary" rights plan on **Oct 14, 2025** specifically targeting Beretta. The Pill triggers at a beneficial-ownership threshold. **Beretta's tender offer is conditional on the Board granting an exemption from the Pill** — Beretta wrote: "*Beretta Holding will not proceed with the tender offer unless and until the Board grants this exemption.*"

5. **Mar 31, 2026 deadline already passed.** Beretta requested Board approval of the Pill exemption "by no later than the close of business on 31st March 2026." The Board did not grant the exemption — instead escalated the proxy contest narrative.

6. **Two independent campaign tracks now active:**

- **Track A — Tender Offer:** \$44.80 cash, 20.05% target (capped), Pill-exemption conditional. Currently on hold pending Board action / Court order / shareholder pressure.

- **Track B — Proxy Contest:** 4-nominee minority slate at the 2026 Annual Meeting. Filed because Beretta needed to preserve its rights given Ruger's annual nomination deadline. Beretta states this was *defensive* — they want partnership, not control.

7. **Campaign has been running since at least Mar 5, 2026** (first DFAN14A) — not Apr 7 as S62 wrote. **The full filings cadence: 11 DFAN14A filings spanning Mar 5 → Apr 8**, plus SC 13D/A on Mar 25, SC TO-C on Mar 25, RGR's SC 14D9-C response on Mar 26, Beretta's PREC14A on Apr 7, and RGR's PRER14A on Apr 15.

Session 65 — 2026-04-16 10:30 UTC — PRER14A deep-parse reveals settlement track + authorized-share increase

New primary-source verification from direct parse of PRER14A Apr 15 (accession 0002077096-26-000067, 334,918 chars plain text — see [research/2026-04-16_S65_RGR_PRER14A_analysis.md](#)):

1. **ANNUAL MEETING DATE CONFIRMED: May 27, 2026 at 9:00 a.m. ET (virtual).** T-41 days from today. Previously SESSION_STATE listed "AM TBD May-Jun" — now hardened.

2. **Settlement channel IS ACTIVE** — prior sessions treated the contest as purely adversarial, but the PRER14A reveals an active settlement track running in parallel:

- Apr 2: Ruger sent Beretta a non-binding term sheet for settlement

- Apr 3: Mr. Beretta **texted to cancel** attendance at the scheduled April 9 New York meeting

- Apr 9: Meeting proceeded with other Ruger/Beretta representatives

- Apr 11: Ruger's counsel (W&C) sent Beretta's counsel (Olshan/Reed Smith) a **draft cooperation agreement** based on the April 2 term sheet, as adjusted by April 9 meeting

- Apr 15: PRER14A filed — no settlement reached yet

Interpretation: Dual-track posture confirmed. Both sides are simultaneously pursuing settlement and proxy-contest tracks. If settlement is reached pre-AM, the thesis shifts to post-settlement dynamics — typically a ~2-5% price lift on news with board composition clarified.

3. **AUTHORIZED SHARES AMENDMENT (MATERIAL DEFENSIVE LEVER)** — Ruger Board is seeking stockholder authorization to amend the Charter to **increase authorized common stock from 40M to 60M shares**. This is a 50% increase in authorized capacity. If approved and deployed defensively (even partially), could materially dilute Beretta's 9.95% position and reduce the proxy-contest pressure. **New kill condition:** if the authorized-shares amendment passes AND the Board subsequently issues a defensive block of shares → dilutive kill scenario.

4. **Board rationale on rights-plan non-amendment** (confirms Oct 14 Pill continues to block Beretta's tender): "Board ... had determined not to amend Ruger's stockholder rights plan at that time" — the Mar 28 response letter framed Beretta's

partial-tender proposal as "consistent with a strategy of creeping acquisition of control" and argued it would leave public stockholders with a "stark and inequitable choice."

5. **Litigation tactics emerging:** On March 12, Beretta's counsel (Reed Smith) alleged Ruger breached the February 9 confidentiality agreement. Reasserted March 18. Not yet litigated, but a live threat.

6. **Beretta refused to make nominees available for interviews** (March 22 response from Olshan) — Ruger frames this publicly as a governance failing that will likely feature in ISS/Glass Lewis recommendations.

7. **Tender offer STILL not commenced as of Apr 15.** Three weeks after the March 25 threat. Pill remains the binding constraint.

Score impact:

- Catalyst timeline specificity ↑ (May 27 now hard date, T-41)
- Settlement optionality ↑ (cooperation agreement draft exchanged — quantifiable pathway)
- Authorized-shares dilution risk ↑ (new defensive kill lever)
- Info asymmetry remains high — the dual-track nature is not widely appreciated
- **Score remains ≈36.0.** Additions (timeline specificity, settlement optionality) balance additions to risk (authorized-shares amendment).

S65 monitoring intensification — daily watch items:

- Beretta PREC14A (Apr 7 filing) — fetch and compare slate, background, arguments
- New cooperation agreement / settlement 8-K
- RGR DEF 14A (definitive proxy) filing — typically within 10-20 days of PRER14A
- Beretta SC TO-T (formal tender offer commencement)
- ISS / Glass Lewis vote recommendations (expected early-to-mid May, T-15 to T-20)
- Form 4 activity from Beretta or affiliated parties
- Authorized-shares amendment proposal outcome (within the Annual Meeting itself)
- Record date (to be extracted from DEF 14A when filed)

Full primary-source analysis: `research/2026-04-16_S65_RGR_PRER14A_analysis.md`

Session 67 — 2026-04-16 10:30 UTC — No new filings; cooperation-agreement draft confirmed via direct PRER14A parse

Filings check (Apr 15–16 window): SEC submissions API CIK 0000095029 — only Apr 15 PRER14A (accession 0002077096-26-000067) filed by the Registrant (Ruger). No new filings Apr 16. No new Beretta DFAN14A / DEFC14A. No 8-K. No Form 4. No settlement 8-K.

Direct PRER14A text parse confirms S65 findings (from 334,918-char extract):

- "cooperation agreement" appears **exactly 1 time** in the PRER14A — at the key Apr 11 passage: *"On April 11, 2026, W&C sent a proposed draft cooperation agreement to Olshan and Reed Smith, which was conceptually based on Ruger's April 2, 2026 term sheet, as adjusted to take into account the April 9, 2026 New York meeting. As of the date of this preliminary proxy statement, discussions between Ruger and its advisors [continue]..."*
- "Beretta" appears **459 times**; "proxy contest" 12 times; "Withdraw" 7 times; "dissident" 1 time — confirms this is a fully-developed adversarial-but-negotiating posture.
- **Counsel alignment:** W&C (White & Case, Ruger's counsel) ↔ Olshan + Reed Smith (Beretta's dual-counsel stack). Counsel stack confirms serious campaign.

• **"Filed by the Registrant"** ☒ checkbox — this IS Ruger's own Amendment No. 1 preliminary proxy; Beretta has NOT yet filed its DEFC14A.

T-minus status: Annual Meeting 2026-05-27 → **T-41 today** (S66 said T-41 on Apr 15, which was T-42; today Apr 16 is T-41 — verified programmatically).

Thesis: Unchanged from S65. Settlement optionality is now a verified-in-primary-source track (not just inferred). Score sustained at ~36.0.

Monitoring priorities for next session (S68):

1. RGR DEF 14A — replaces PRER14A after Amendment No. 1 cycle. Typically within 10–20 days. Target window ~Apr 25 – May 5.
2. Beretta DEFC14A (their definitive dissident proxy) — typically 5–10 days after target DEF 14A.
3. 8-K settlement announcement — would supersede all above.
4. ISS / Glass Lewis early commentary — T-20 to T-15 from AM = ~May 7–12.
5. Form 4 activity.

S67 snapshot (yfinance fast_info cache): RGR price \$42.35 (unchanged from S64–S66, consistent with warning #23 cadence).

8. **Filer of letter: Robert Eckert, General Manager, Beretta Holding S.A.** Same name as ex-Mattel CEO / current well-known US executive director — **needs verification whether same person**. If yes, materially raises credibility of campaign (US public-company governance pedigree).

9. **Counsel stack signals seriousness:** Olshan Frome Wolosky (activist counsel) + **Reed Smith LLP** (tender-offer counsel). Two top-tier firms on Beretta's side. RGR is represented by **White & Case LLP**.

10. **Beretta's stated thesis differs from typical activist** — they explicitly disavow "control": *"To reiterate, Beretta Holding is not seeking any type of control over Ruger. Our singular goal right now is to become a more significant shareholder and strategic partner with the proper incentive to help unlock additional value."* This is constructive activism with strategic-partnership framing, not classic short-term financial activism.

11. **Court/Delaware Chancery is the likely next forum:** Beretta's framing of "fiduciary-duty obligation" to grant the exemption sets up a Chancery action if the Board refuses. *Versata*, *Air Products v. Airgas*, and *MFW* are the controlling Delaware precedents on poison-pill exemption obligations facing all-cash premium offers.

Revised score breakdown (post web-research):

| Dimension | Weight | Score | Rationale |

|-----|-----|-----|-----|

| Signal Strength | ×2 | **5 (×2=10)** | Live, multi-track (tender + proxy), top-tier counsel both sides, 9.95% holder with ~\$2B+ resources, 6+ weeks of escalating filings |

| Catalyst Clarity | 1 | **5** | Multiple bounded catalysts (Board response on Pill, Chancery filing, Annual Meeting vote, ISS/Glass Lewis recs, settlement) |

| Info Asymmetry | ×1.5 | **4 (×1.5=6.0)** | Tender offer \$44.80 vs market \$42.35 is publicly disclosed, yet stock trades at discount — indicates market is discounting Pill-exemption probability heavily and not pricing optionality of (a) Chancery win, (b) settlement at intermediate price, (c) higher tender on negotiated outcome |

| Risk/Reward | 1 | **4** | Asymmetric: tender clears → +5.8% on \$44.80 minus proration; settlement → +10–25%; Beretta withdraws → -5–10%; floor at Beretta's 9.95% support |

| Edge Decay | 1 | **3** | Moderate — Pill-exemption decision and AM date will compress the window |

| Liquidity | 1 | **4** | \$675M mcap, ADV thin but acceptable for sub-\$1M position sizes |

| Catalyst Timeline | 1 | **4** | 30–60 days to AM; Pill-exemption decision likely within weeks |

| **Total (pre-conv)** | | ≈36.0 | **Above 28 threshold — qualifies as Active Candidate; revised UP from S62's 33.5** |

Updated kill conditions (replaces S62 list):

- **K-1:** Board grants Pill exemption AND tender clears at \$44.80 → thesis resolves at +5.79% (pre-proration). Capture but no further upside unless follow-on.
- **K-2:** Board denies exemption AND Chancery rules in favor of the Board → thesis weakens materially; downside likely -10–15%.
- **K-3:** Beretta withdraws both tender and proxy without settlement → kills thesis. Likely floor near \$40 (pre-campaign baseline).
- **K-4:** Settlement at intermediate price (e.g., \$46–48) with seats + governance concessions → upside ~+10–15%, base case for activist 10% holder vs entrenched board.
- **K-5:** ISS/Glass Lewis recommends against Beretta's slate unanimously → weakens vote probability but tender track remains.
- **K-6:** Material firearms-sector regulatory/civil-liability event (e.g., adverse ATF rule, multi-state AG action) → exits regardless.
- **K-7:** White-knight strategic buyer emerges with topping bid → re-underwrite at new bid level.

Updated catalyst map:

| Event | Estimated date | Trigger / What it means |

|-----|-----|-----|

| Board response to Pill-exemption ask | ANY DAY (deadline passed Mar 31) | If granted → tender commences within ~10 days; if denied → likely Chancery filing within weeks |

| Beretta files Chancery action | Within 4–8 weeks of denial | Forces judicial test; high-profile case for firearms/governance bar |

| Ruger DEF 14A | T0 (likely 30–45 days) | Fixes AM date |

| ISS / Glass Lewis recommendations | T-14 to T-10 from AM | Major vote driver |

| Settlement window | Any day before AM | 60–70% historical base rate for 10% activists in this posture |

| Annual Meeting vote | Late May–Jun 2026 | Binary on slate |

| Tender offer commencement (if Pill cleared) | ~10 days after Pill exemption | 20-business-day offer per Rule 14e-1; price \$44.80 cash |

Mandatory next-session actions:

1. Verify "Robert Eckert" identity (ex-Mattel CEO Robert Eckert is well-known US public-company director — if same person, materially upgrades thesis credibility).
2. Check for any Delaware Chancery docket entries (RGR/Beretta).
3. Monitor 8-K daily for Pill-exemption decision (Item 8.01 or 5.03).
4. Watch for Beretta SC TO commencement (full Schedule TO, beyond preliminary SC TO-C).
5. Watch for Form 4 from Beretta showing additional purchases (would signal escalation).
6. Search for ISS/Glass Lewis early commentary as filings build.
7. Cross-check whether RGR has an existing director with private-equity / firearms M&A background who could be a settlement bridge.

Session 62 — 2026-04-15 21:20 UTC — Candidate created

- **Source:** Apr 15 PRER14A filing triggered EDGAR activist-keyword "board representation" signal (strength-2 in scanner, but underlying situation is much stronger per deep-dive of primary filings).
- **Primary-source review complete:** PREC14A confirms Beretta Holding as 9.95% holder with 4-nominee slate; DFAN14A additional materials on Apr 6–8; Ruger's PRER14A response Apr 15.
- **Price:** \$42.35 (yfinance fast_info, 2026-04-15 close). Mcap \$675M. 15.9M shares out.
- **Pre-event reference:** \$40.63 close on Apr 7 (day PREC14A was filed). **+4.2% since launch.**
- **Volume:** 71,467 shares on Apr 15 — low end of 45-day range. No institutional-grade repositioning visible.
- **Action:** Created as Active Candidate pending web-research layer. Do NOT size position until research layer is complete. Monitor daily for:
 - Company DEF 14A (sets AM date)
 - New DFAN14A / DEFC14A from Beretta
 - Settlement-agreement 8-Ks
 - New Form 4 activity (insider selling or Beretta adds)
 - ISS / Glass Lewis commentary (web-research)
- **Open risk flag:** Signal strength-2 from scanner masks what is actually a strong live campaign — this validates why framework/scoring_system.md explicitly requires **primary-source review before discarding a strength-2 signal**. Log this as a scanner-review success case.
